## Experience

### Thoughtworks

2021 - Present

I have been playing a senior consultant role in Thoughtworks which requires me to actively contribute on Technical as well as on leadership aspects.

I have been involved in development, infrastructure, business analysis and client communication. It requires me to focus on technical analysis, delivery planning and consultation to various clients.

### QMetry, Infostretch

2017 - 2021

I had contributed as a Senior Software Engineer as well as Technical Leader in QMetry. My role and responsibility included product feature development, L1 support, client communication and technical leadership.

I majorly invested into new feature development of QMetry for JIRA plugin which required extensive knowledge of JIRA platform and integrations.

L1 Support required communication with users of the product across the globe to understand and triage the issues.

### Spec India

2014 - 2017

I played a Software Engineer and Senior Software Engineer role. Majorly I contributed to feature development of new applications in the education domain.

The role is required to get into regular tech discussions with clients for design and development decisions for improvement in practices and overall code quality.

## Education

### Bachelor's in Information & Technology

Government Engineering College  
Gandhinagar, Gujarat, India

## Skill

### Programming

Experienced in Java, JavaScript, SQL and Git. Comfortable in Python, Clojure, NodeJS and ReactJS.
